

The Design System (The "Vibe")

- **Base Theme:** "Midnight Engineering." Deep blacks (#050505) and dark greys (#1A1A1A) to make the light beams *pop*.
 - **Accent Color:** **Diode Red** (from their logo) or **Amber** (like a turn signal) for CTAs. Used sparingly.
 - **Typography:** A technical Sans-Serif (e.g., *Inter* or *Space Grotesk*) for headers (Engineering feel), paired with a clean geometric font for body text.
 - **Imagery: Cinematic & Moody.** No white background product shots on the homepage. Everything should look like it's on a car, at night, in the rain.
-

The Website Flow (Homepage -> Checkout)

1. The Hero Section (Above the Fold)

- **Visual:** Full-screen looped video (muted). A Thar or Scorpio-N driving through pitch-black fog, then—*CLICK*—the lights cut through like lasers.
- **Headline:** "See What You've Been Missing." (Psychology: Curiosity/Safety).
- **Sub-headline:** "Engineering-grade lighting systems for the modern Indian explorer."
- **Primary CTA:** Explore Systems (Ghost button with glowing border).
- **Secondary CTA:** Watch the Difference (Play icon).

2. The "Science of Light" (The Educational Anchor)

- **Reference:** This mirrors the "What is Tuning?" section from your second image.
- **Layout:** Split screen.
 - **Left:** A speedometer-style graphic or a "Lux Graph" showing standard halogen brightness vs. Diode Dynamics.
 - **Right:** Text: "Not Just Brighter. Smarter." Explain **TIR Optics** (Total Internal Reflection) in 3 bullet points.
- **Micro-Interaction:** A slider titled "**Slide to Upgrade.**"
 - *Left position:* Image of a dark road (Stock lights).
 - *Right position:* Same road illuminated clearly (Diode lights).

- *Why:* Users love playing with sliders; it physically demonstrates value.

3. The "Stage" Selector (The 'Membership' Cards)

- *Reference:* This mirrors the "White / Silver / Black" cards from your first image.
- **Concept:** Instead of just listing products, we group them by intensity tiers.
- **Card 1: Sport Series**
 - *Tagline:* "The Daily Driver."
 - *Visual:* Clean, silver accent.
 - *Price:* Starting ₹18,000.
- **Card 2: Pro Series**
 - *Tagline:* "The Weekend Warrior."
 - *Visual:* Glowing white accent.
 - *Price:* Starting ₹30,000.
- **Card 3: Max Series**
 - *Tagline:* "Competition Grade."
 - *Visual:* aggressive Red accent.
 - *Price:* Starting ₹50,000.
- **Psychology:** This "Good, Better, Best" pricing anchors the user. Most will pick the middle "Pro" option (the Decoy Effect).

4. The Product Page (The "Advlust" Minimalist Layout)

- *Reference:* You wanted the price/description flow like *Advlust*.
- **Layout:** Two-Column Sticky Layout.
 - **Left Column (Visuals - Scrollable):**
 - Huge, high-res vertical images.
 - Image 1: The Light Pod close up (engineering porn).
 - Image 2: The Light on a car (context).
 - Image 3: The Beam Pattern diagram (technical proof).

- **Right Column (Info - Sticky/Fixed):**
 - **Title:** SS3 LED Pod Kit - SAE Fog.
 - **Price:** ₹24,500 (Large, Bold font).
 - **Selectors:** Minimalist pills for "Beam Pattern" (Fog, Driving, Spot) and "Color" (White, Yellow).
 - **The "Add to Cart" Button:** Full width. Says Secure Your Build instead of just "Buy Now."
 - **Description:** Accordion style (Click to expand). Keep it clean.
 - Specs
 - What's in the box
 - Warranty (8 Years)

5. The "Fit Your Vehicle" (The E-Commerce Engine)

- **Visual:** A dark garage background.
- **Action:** A simple dropdown menu:
 - Select Make (Mahindra, Toyota, Maruti)
 - Select Model (Thar, Hilux, Jimny)
- **Result:** "We found 4 upgrades for your **Mahindra Thar**."
- **Why:** Personalization increases conversion rates by 20%+.

6. Social Proof & Footer

- **Visual:** A masonry grid of Instagram photos from real customers.
- **Headline:** "Built by Enthusiasts. Tested in India."
- **Footer:** Minimalist. Links to "Installation Guides" and "Warranty Claims."

Figma Developer Hand-off Notes (Technical Specs)

- **Grid System:** 12-Column Grid. Max-width 1440px.
- **Mobile Responsiveness:**

- The "Three Cards" (Stage Selector) turn into a horizontal swipe carousel on mobile.
- The "Slider" (Stock vs. Diode) becomes a "Tap to Toggle" on mobile.
- **Animations:**
 - **Parallax Scroll:** The cars in the background move slightly slower than the text as you scroll down (Luxury feel).
 - **Hover Effects:** Buttons shouldn't just change color; they should glow or expand slightly.

The "Official Partner" Badge (Above the Fold)

- **Location:** Right under the "Explore Systems" button in the Hero Section.
- **Visual:** A small, monochromatic row of logos with 50% opacity (subtle).
- **Content:**
 - [Logo: Diode Dynamics USA] Official India Partner
 - [Icon: Shield] 8-Year Warranty
 - [Icon: Plane] Express Air Shipping
- **Psychology:** Before they even scroll, you've answered the question: *"Is this real?"*

2. The "Verified Performance" Section (The Reviews)

- **Location:** Between the "Fit Your Vehicle" section and the Footer.
- **Visual Strategy:** "The Dark Mode Proof."
- **Layout:** A horizontal scrolling carousel of 3 "Review Cards."

The Review Card Design:

- **Background:** Matte Dark Grey (#111) with a subtle glass-morphism border.
- **Top Left:** ★ ★ ★ ★ ★ (Gold stars, glowing slightly).
- **Top Right:** Verified Purchase (Green tick badge).
- **The Image (Crucial):** Instead of a user profile pic, we use a **Photo of their Car** with the lights on.
- **The Text:**

"I was skeptical about the price. But the cut-off line on my Scorpio-N is razor sharp. No blinding oncoming traffic, just pure daylight. Worth every rupee."

- **The Author:** — Rohan K., Hyderabad (Scorpio-N Z8L)
- **Micro-Interaction:** When you hover over the review card, the "Car Photo" zooms in slightly.

3. The "Trust Highlights" Bar (The Closer)

- **Location:** Sticky at the bottom of the Product Page (or just below the "Add to Cart" button).
- **Visual:** Minimalist icons with bold, uppercase text.
- **Content (4 Pillars):**
 1. **NO CUTTING:** "100% Plug & Play. No warranty void." (Addresses the biggest fear).
 2. **USA ENGINEERING:** "Designed in St. Louis. Not generic Chinese LEDs."
 3. **STREET LEGAL:** "SAE Compliant Patterns. Cop-magnet free."
 4. **INSTANT SUPPORT:** "WhatsApp us directly. Real humans."

Refined "Trust" Wireframe Prompt (For Developer)

If you are handing this off to a developer, give them this specific instruction for the Review Section:

"Create a 'Testimonial Slider' that feels like a premium car brochure, not an Amazon review section. Use dark backgrounds, high-contrast white text, and make sure the 'Verified Owner' badge is prominent. The images used for reviews must be high-quality night shots of cars, not people's faces."

TUNING PERFECTION

Tuning is an upgrade
that unlocks hidden
potential of your car

↓ [Explore](#)

WHY DO YOU WANT IT?

What is Tuning and Why do You Want It?

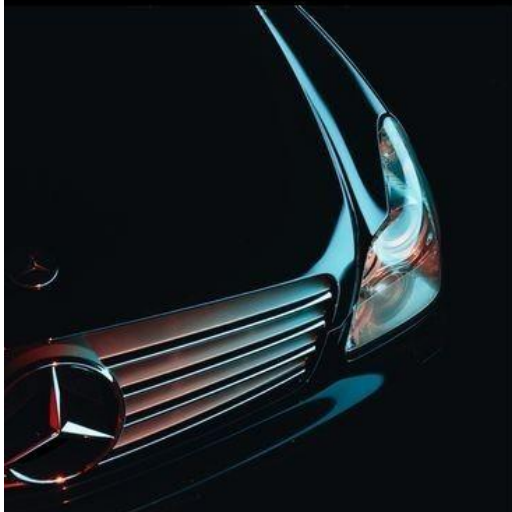

Tuning is an upgrade to the software in the vehicle's computer. Custom software is installed that changes many parameters that control the way the engine operates. With proper tuning, you can increase both power and fuel economy.

A comprehensive tool
for high horsepower
builds.

With proper tuning,
you can increase fuel
economy.

ADVANTAGES

What can I Expect from Tuning?

What can I Expect from Tuning?

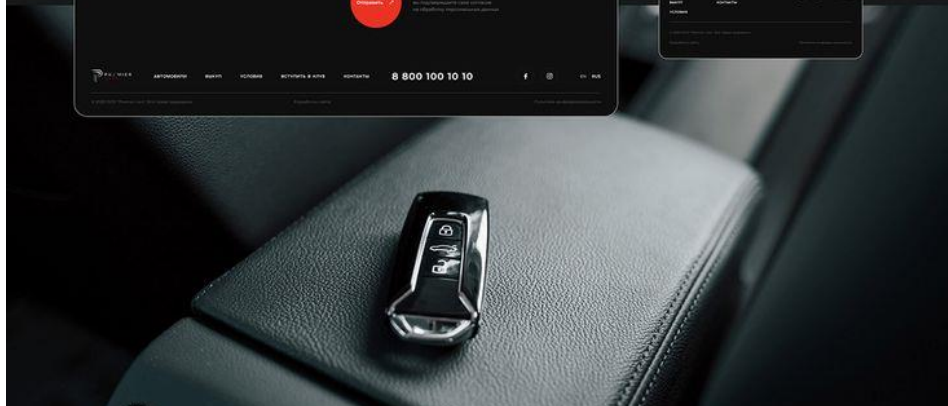

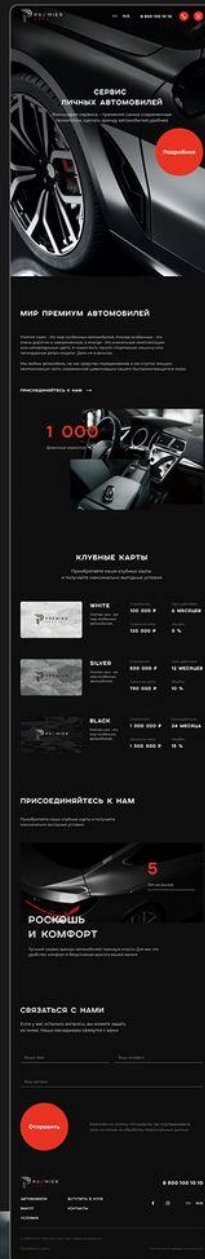

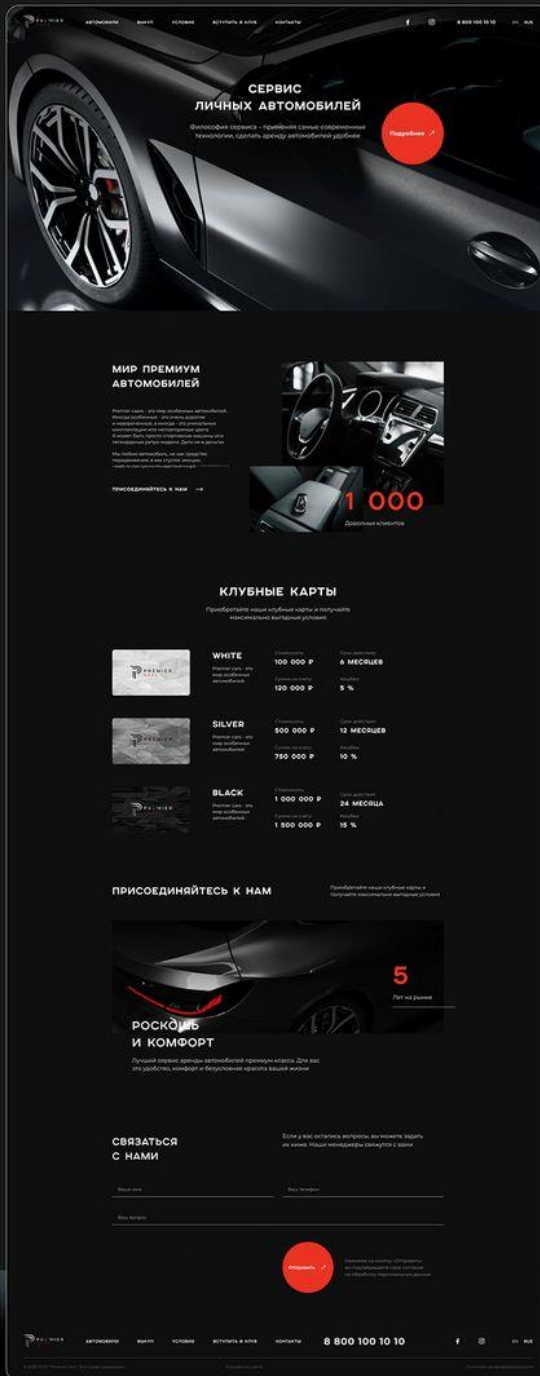

Through proper modification, it is possible to greatly increase the power output of the vehicle, while at the same time improving safety and longevity of the engine, drivability, and smoothness.

20-35 hp

roughly increase from
a stage 1 tune

35-50 hp

roughly increase from
a stage 2 tune

2. HOMEPAGE CONTENT

Hero Section (Above the Fold)

- **H1 Headline:** Don't Just Add Light. **Engineer It.**
- **Sub-Headline:** The only SAE-Compliant, Anti-Glare Lighting System for the modern Indian explorer.
- **Button 1:** Explore Systems
- **Button 2:** Watch the Cut-Off Test

Section: The Problem vs. The Solution

- **Headline:** Why Your "Bright" Lights Are Dangerous.
- **Body Copy:**

Most aftermarket LEDs rely on raw wattage. They spray light everywhere—blinding oncoming traffic and reflecting off fog back into your eyes. That's not performance; that's glare.

Expelight brings Diode Dynamics (USA) to India. We use TIR (Total Internal Reflection) optics to capture 100% of the light and shoot it exactly where you need it: On the road, not in their eyes.

Section: The "Stage" Selector (Product Tiers)

- **Stage 1: Sport Series**
 - *Headline:* The Daily Driver.
 - *Copy:* 2x Brighter than stock. Street-legal SAE patterns. The perfect plug-and-play upgrade for city and highway commutes.
- **Stage 2: Pro Series**
 - *Headline:* The Weekend Warrior.
 - *Copy:* 4x Brighter. Maximum intensity for dark highways and sudden trails. The #1 choice for Mahindra Thar owners.
- **Stage 3: Max Series**
 - *Headline:* Competition Grade.
 - *Copy:* Unmatched distance. Used by professional rally teams. If you drive where roads don't exist, this is your light.

3. PRODUCT PAGE COPY (Example: SS3 Fog Kit)

Designed for "Transactional Intent" - People ready to buy.

Product Title: SS3 3-Inch LED Pod Kit – SAE Fog (Type A/B Fitment)

Price: ₹24,500 (Pro Series)

Short Description:

The highest-output 3-inch LED pod on the market. The SS3 features our patented TIR Optics, delivering high-intensity light with a razor-sharp cut-off line. Designed in St. Louis, USA. Tested for the Indian Monsoon.

Features List (Bullet points for easy scanning):

- **Zero Glare:** SAE-Compliant Fog beam pattern ensures you never blind oncoming traffic.
- **Bolt-On Fit:** Direct replacement for Mahindra Thar (2020+), Scorpio-N, and Maruti Jimny. No cutting, no drilling.
- **TIR Technology:** Captures more light than standard reflectors, making the Pro Series brighter than generic "100W" Chinese bars.
- **8-Year Warranty:** We don't just say quality; we guarantee it.

4. THE "SCIENCE OF LIGHT" (Educational Page)

This section is CRITICAL for AI Ranking. It defines terms so Google sees you as the "Teacher."

H1: What is TIR Optics? (Total Internal Reflection)

The Definition:

Traditional LEDs use a reflector (like a torch) or a projector lens (like a magnifying glass). Both lose light efficiency. TIR (Total Internal Reflection) is a custom-molded optic that acts as both. It captures 100% of the LED's output and focuses it with laser precision.

Comparison Table (Great for Google Snippets):

Feature	Generic Aftermarket LED	Projector HID/LED	Diode Dynamics (TIR)
Efficiency	< 50% (Light spills everywhere)	~70% (Loss in lens)	> 95% (Direct Focus)
Glare	High (Blinds others)	Low (Cut-off line)	Zero (SAE Standard)
Durability	Plastic/Glue (Fades in 1 yr)	Complex moving parts	Solid State (Lasts 10+ yrs)

5. FAQ SECTION (Voice Search Optimized)

These are written as direct answers to common questions. When someone asks Siri/Google, your site provides the answer.

Q: Which is better: White or Yellow fog lights?

A: It depends on your driving conditions. 6000K Cool White looks modern and matches factory LED headlights, making it great for general visibility. 3000K Selective Yellow is superior for bad weather (rain, fog, snow) because yellow light scatters less than white light, reducing glare back into the driver's eyes.

Q: Will installing these lights void my car's warranty?

A: No. Expelight kits are designed as "Plug-and-Play." We use factory-style connectors that plug directly into your car's existing wiring harness. There is no wire cutting or splicing required, meaning your vehicle's electrical warranty remains intact.

Q: Are these brighter than 100W Chinese LEDs?

A: Wattage is a measure of power consumption, not brightness. A generic 100W light often wastes 60W as heat. Diode Dynamics lights may consume less power (e.g., 40W) but produce more usable light (Candela) on the road because of our efficient TIR optics. Brighter isn't always better; focused is better.

6. TRUST & REVIEWS (Social Proof)

Real-world language that sounds authentic.

Header: Proven on Indian Roads.

- **Review 1:** "I tried the cheap '150W' LEDs from Karol Bagh. They were bright but scattered light everywhere. The SS3 Pro from Expelight puts the light exactly where I need it. The cut-off line is insane." — *Vikram S., Chandigarh (Thar 2023)*
 - **Review 2:** "Expensive? Yes. But you buy it once. I've been through two monsoons in Mumbai with these, and not a single drop of moisture inside." — *Aditya R., Mumbai (Scorpio-N)*
-

Developer Note:

1. **H-Tags:** Ensure the headlines (H1, H2) match the ones above.
2. **Alt Text:** Every image of a light must have alt text like: "*Mahindra Thar with Diode Dynamics SS3 Yellow Fog Lights driving in rain.*"
3. **Schema Markup:** Ask your developer to add "**Product Schema**" and "**FAQ Schema**" to the code. This is how you get the "Star Ratings" and "Questions" to show up directly on the Google Search results page.
